

Portfolio Project. Changes

Sofiia Pankiv C00301189

1. The Ticker and Title on the "Info" page and ticker on the "Portfolio" page are not quite the right size because of the padding on the page.
2. On the "Portfolio" page I made simple grid but in prototype there had to be grid that looks like one from Pinterest.
3. Put one picture on top of every "project" page. The initial idea was that the images should be under a block with text and a background colour that would move over the images like in the SquareMe (<https://squareme.si/en/projects/pristop-x-fish/>) website, but I couldn't bring this idea to life.

Mobile Version

1. The text on the "Info" page is in the bottom, despite of the prototype idea.
2. Navigation buttons on the Header is in a column but not in the row.
3. In "Contact" page the address is under the image of the ferret and there is no horizontal yellow line like on the desktop version and in the prototype.
